

PROJECTLINK SYSTEMS

Microsoft EPM ToGo

ProjectLink has created a customised EPM ToGo solution. The solution was configured using the most standard project management requirements that were established from working within different organisations.

EPM ToGo is a powerful yet simple configuration to use. It is an easy installation and a convenient answer to creating a standardised method to enforce Project Management Methodologies. The solution is sold as a complete package including all required installation, implementation, training and support.

The EPM ToGo Solution includes a number of preconfigured views and tables within Microsoft Project as well as customised views and reports that can be access via Project Server. This will assist Project Mangers to report on progress easily and effectively.

The EPM ToGo solution is makes use for Widows SharePoint Services as a collaborative environment for an organisation. Resources can generate and classify risks and issues, which can then be assigned to different individuals on the project team to handle. It can also be used as a document management system which includes version control.

KEY FEATURES

Alignment To International Standards

Aligned with principles and standards as stipulated in the PMI®'s PMBOK® Guide

Scalability

- EPM ToGo can be applied to project environments of any size in any industry
- EPM ToGo supports the organisation to gain visibility, insight, and control across all levels

Hands On Project Management

Empowers individuals to possess hands-on project management skills and tools, in addition to enhancing decision-making, improving alignment with business strategy and maximizing resource utilization.
